

OPHIDIAN CORPORATION  
OFFICE OF THE CORPORATE HEADQUARTERS  
RESET VII, ANKARD, METROPOLIS

Memorandum for General Release  
Prepared 06.14YC112

The **Ophidian Corporation** is proud to announce the completion of our comprehensive corporate restructuring according to international commercial operating standards recognized by CONCORD for incorporation within Directive Enforcement Division (DED) and Secure Commerce Commission (SCC) jurisdiction. Ophidian is to be reborn as a truly pan-galactic organization with a revitalized mission and newly empowered operations department. As of 0000 hours Yulai standard time on 06.15YC112, Ophidian will be entered into the SCC registry as an active corporation with the universal trade ticker of OPHC. Pursuant to this activation will be the institution of our new mission statement:

We tirelessly seek new knowledge and practical applications for making human lifetimes longer, healthier, and happier.

To spearhead that effort, we will be launching a new, state-of-the-art biomedical laboratory at our OPHC headquarters complex. Abiding by the most rigorous standards, but always searching for the next step in human enhancement, the researchers at our main laboratory and satellite operations centers will begin work immediately. As in the past, the improvement and expansion of traditional medical products and procedures will be an important component of Ophidian's work. The company will continue to support our popular product lines of AIMED programming and DIY cosmetic alterations. The main focus of the corporate effort will, however, shift to new areas in order to better meet our customer's needs.

Development in **cybernetics, neurointerfacing, and cloning support services** will drive our operations with a focus on applications in space-based industries. Combined with a robust basic research effort, this new direction will enable Ophidian to more efficiently and effectively provide our customers with our flagship product: a better life.
